## DOMAIN WINTER WINNING CAMP(Day-8)

**Student Name:**Subhojit Ghosh  
**Branch:** BE-CSE  
**Semester:** 6th

**UID:** 22BCS15368  
**Section/Group:** 620-B  
**Date of Performance:** 29/12/24

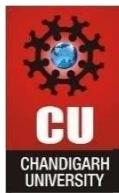

### 1) N-th Tribonacci Number

```
#include <iostream>
#include <vector>
using namespace std;

int tribonacci(int n) {
    vector<int> dp(max(3, n + 1));
    dp[0] = 0;
    dp[1] = dp[2] = 1;
    for (int i = 3; i <= n; i++) {
        dp[i] = dp[i - 1] + dp[i - 2] + dp[i - 3];
    }
    return dp[n];
}

int main() {
    int n = 4;
    cout << "Tribonacci(" << n << ") = " << tribonacci(n) << endl;
    return 0;
}
```

The screenshot shows a code editor interface with a dark theme. On the left, the file name 'main.cpp' is visible. The code area contains the provided C++ code for calculating the Tribonacci sequence. On the right, there are several buttons: a copy icon, a share icon, a 'Run' button (which is blue), and an 'Output' button. The 'Output' panel displays the result of running the code: 'Tribonacci(4) = 4' and '==== Code Execution Success'. The code editor also shows the line numbers and syntax highlighting for the code.

# DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Discover. Learn. Empower.

## 2) Divisor Game

```
#include <iostream>
using namespace std;

bool divisorGame(int n) {
    return n % 2 == 0;
}

int main() {
    int n;
    cout << "Enter the value of n: ";
    cin >> n;
    cout << "Alice wins: " << (divisorGame(n) ? "Yes" : "No") << endl;
    return 0;
}
```

main.cpp	Run	Output
1 #include <iostream> 2 using namespace std; 3 4 bool divisorGame(int n) { 5     return n % 2 == 0; 6 }		Enter the value of n: 5 Alice wins: No ==== Code Execution Success

## 3) Climbing Stairs

```
#include <iostream>
using namespace std;

int climbStairs(int n) {
    if (n <= 2) return n;
    int a = 1, b = 2;
    for (int i = 3; i <= n; i++) {
        int temp = a + b;
        a = b;
        b = temp;
    }
    return b;
}

int main() {
    int n;
    cout << "Enter the number of steps: ";
    cin >> n;
    cout << "Ways to climb " << n << " stairs: " << climbStairs(n) << endl;
    return 0;
}
```

# DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Discover. Learn. Empower.

**Output :**

The screenshot shows a code editor interface with a dark theme. On the left, the code file 'main.cpp' contains a C++ program to calculate the number of ways to climb a staircase. On the right, the 'Output' panel shows the execution results. The user input 'Enter the number of steps: 2' is followed by the output 'Ways to climb 2 stairs: 2'. Below this, a message '== Code Execution Successful' is displayed.

```
main.cpp
1 #include <iostream>
2 using namespace std;
3
4 int climbStairs(int n) {
5     if (n <= 2) return n;
6     int a = 1, b = 2;
7     for (int i = 3; i <= n; i++) {
8         int temp = a + b;
9         a = b;
10        b = temp;
11    }
12    return b;
13 }
```

Output

```
Enter the number of steps: 2
Ways to climb 2 stairs: 2
== Code Execution Successful
```

## 4) Best Time to Buy and Sell Stock

```
#include <iostream>
#include <vector>
#include <climits> // For INT_MAX
using namespace std;

int maxProfit(vector<int>& prices) {
    int minPrice = INT_MAX, maxProfit = 0;
    for (int price : prices) {
        minPrice = min(minPrice, price); // Update the minimum price seen so far
        maxProfit = max(maxProfit, price - minPrice); // Calculate the maximum profit
    }
    return maxProfit;
}

int main() {
    int n;
    cout << "Enter the number of days: ";
    cin >> n;

    vector<int> prices(n);
    cout << "Enter the stock prices: ";
    for (int i = 0; i < n; i++) {
```

# DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Discover. Learn. Empower.

```
cin >> prices[i];  
}  
  
cout << "Max profit: " << maxProfit(prices) << endl;  
return 0;  
}
```

The screenshot shows a Windows desktop environment with a taskbar at the bottom. The taskbar includes icons for WhatsApp, ChatGPT, and the online compiler window, along with system status icons like battery level, signal strength, and date/time (7:45 PM, 12/28/2024).

The main window is the Programiz C++ Online Compiler. It has a dark theme with a header bar featuring the Programiz logo, a banner for "Premium Coding Courses by Programiz", and a "Programiz PRO" button. The left sidebar lists various programming language icons, and the main area shows the C++ code in a text editor and its output in a terminal-like interface.

**Code (main.cpp):**

```
1 #include <iostream>
2 #include <vector>
3 #include <climits> // For INT_MAX
4 using namespace std;
5
6 int maxProfit(vector<int>& prices) {
7     int minPrice = INT_MAX, maxProfit = 0;
8     for (int price : prices) {
9         minPrice = min(minPrice, price); // Update the minimum
10        price seen so far
11        maxProfit = max(maxProfit, price - minPrice); // Calculate the maximum profit
12    }
13    return maxProfit;
14 }
15 int main() {
16     int n;
17     cout << "Enter the number of days: ";
18     cin >> n;
```

**Output:**

```
Enter the number of days: 6
Enter the stock prices: 7
1
5
3
6
4
Max profit: 5

== Code Execution Successful ==
```

At the bottom right of the compiler window, there is a message: "Activate Windows Go to Settings to activate Windows."

# **DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING**

## **5) Generate Parentheses**

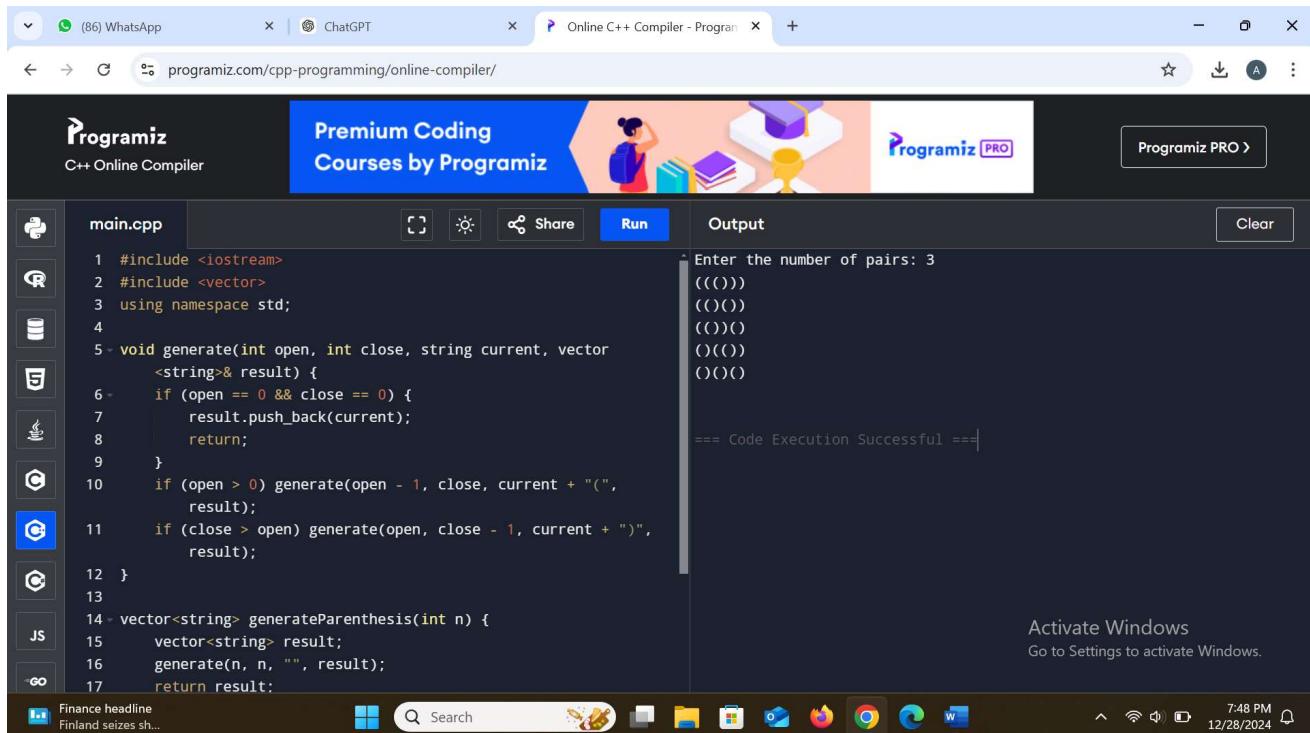

```
#include <iostream>
#include <vector>
using namespace std;

void generate(int open, int close, string current, vector<string>& result) {
    if (open == 0 && close == 0) {
        result.push_back(current);
        return;
    }
    if (open > 0) generate(open - 1, close, current + "(", result);
    if (close > open) generate(open, close - 1, current + ")", result);
}

vector<string> generateParenthesis(int n) {
    vector<string> result;
    generate(n, n, "", result);
    return result;
}

int main() {
    int n;
    cout << "Enter the number of pairs: ";
    cin >> n;
    vector<string> result = generateParenthesis(n);
    for (const string& s : result) {
        cout << s << endl;
    }
    return 0;
}
```

# DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

## 6) Minimum Path Sum

```
#include <iostream>
#include <vector>
using namespace std;

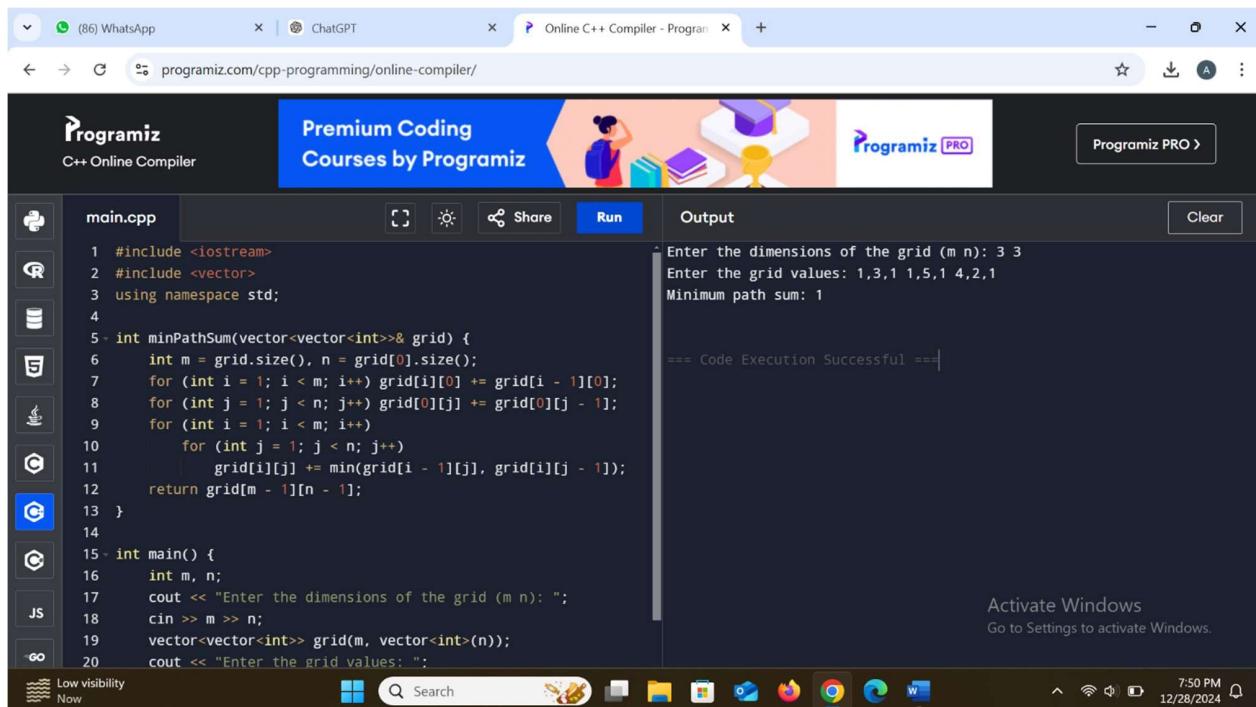

int minPathSum(vector<vector<int>>& grid) {
    int m = grid.size(), n = grid[0].size();
    for (int i = 1; i < m; i++) grid[i][0] += grid[i - 1][0];
    for (int j = 1; j < n; j++) grid[0][j] += grid[0][j - 1];
    for (int i = 1; i < m; i++)
        for (int j = 1; j < n; j++)
            grid[i][j] += min(grid[i - 1][j], grid[i][j - 1]);
    return grid[m - 1][n - 1];
}
```

```
int main() {
    int m, n;
    cout << "Enter the dimensions of the grid (m n): ";
    cin >> m >> n;
```

# DEPARTMENT OF

# COMPUTER SCIENCE & ENGINEERING

```
vector<vector<int>> grid(m, vector<int>(n));
cout << "Enter the grid values: ";
for (int i = 0; i < m; i++)
    for (int j = 0; j < n; j++)
        cin >> grid[i][j];
cout << "Minimum path sum: " << minPathSum(grid) << endl;
return 0;
}
```

The screenshot shows a browser window with the URL [programiz.com/cpp-programming/online-compiler/](https://programiz.com/cpp-programming/online-compiler/). The page title is "Online C++ Compiler - Program". The main content area displays a C++ code editor and an output terminal.

**Code Editor:**

```
main.cpp
1 #include <iostream>
2 #include <vector>
3 using namespace std;
4
5 int minPathSum(vector<vector<int>>& grid) {
6     int m = grid.size(), n = grid[0].size();
7     for (int i = 1; i < m; i++) grid[i][0] += grid[i - 1][0];
8     for (int j = 1; j < n; j++) grid[0][j] += grid[0][j - 1];
9     for (int i = 1; i < m; i++) {
10         for (int j = 1; j < n; j++)
11             grid[i][j] += min(grid[i - 1][j], grid[i][j - 1]);
12     }
13 }
14
15 int main() {
16     int m, n;
17     cout << "Enter the dimensions of the grid (m n): ";
18     cin >> m >> n;
19     vector<vector<int>> grid(m, vector<int>(n));
20     cout << "Enter the grid values: ";
```

**Output Terminal:**

```
Enter the dimensions of the grid (m n): 3 3
Enter the grid values: 1,3,1 1,5,1 4,2,1
Minimum path sum: 1

== Code Execution Successful ==
```

At the bottom right of the terminal, there is a message: "Activate Windows Go to Settings to activate Windows". The system tray at the bottom of the screen shows the date and time as 12/28/2024 7:50 PM.

# **DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING**

## **7) Maximal Rectangle**

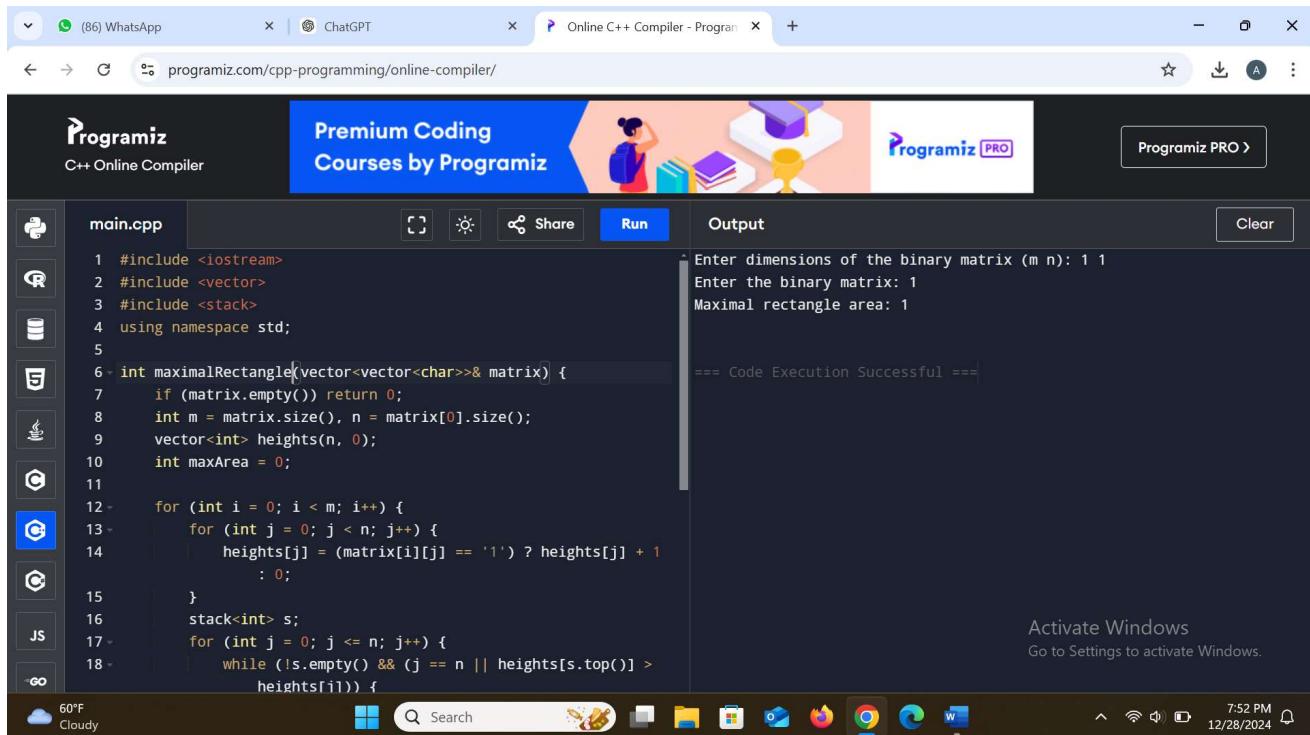

```
#include <iostream>
#include <vector>
#include <stack>
using namespace std;

int maximalRectangle(vector<vector<char>>& matrix) {
    if (matrix.empty()) return 0;
    int m = matrix.size(), n = matrix[0].size();
    vector<int> heights(n, 0);
    int maxArea = 0;

    for (int i = 0; i < m; i++) {
        for (int j = 0; j < n; j++) {
            heights[j] = (matrix[i][j] == '1') ? heights[j] + 1 : 0;
        }
        stack<int> s;
        for (int j = 0; j <= n; j++) {
            while (!s.empty() && (j == n || heights[s.top()] > heights[j])) {
                int h = heights[s.top()];
                s.pop();
                int width = s.empty() ? j : j - s.top() - 1;
                maxArea = max(maxArea, h * width);
            }
            s.push(j);
        }
    }
    return maxArea;
}

int main() {
    int m, n;
    cout << "Enter dimensions of the binary matrix (m n): ";
    cin >> m >> n;
    vector<vector<char>> matrix(m, vector<char>(n));
    cout << "Enter the binary matrix: ";
    for (int i = 0; i < m; i++)
        for (int j = 0; j < n; j++)
            cin >> matrix[i][j];
    cout << "Maximal rectangle area: " << maximalRectangle(matrix) << endl;
    return 0;
}
```

# DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

## 8) Dungeon Game

```
#include <iostream>
#include <vector>
#include <climits> // For INT_MAX
using namespace std;

int calculateMinimumHP(vector<vector<int>>& dungeon) {
    int m = dungeon.size(), n = dungeon[0].size();
    vector<vector<int>> dp(m + 1, vector<int>(n + 1, INT_MAX));
    dp[m][n - 1] = dp[m - 1][n] = 1;

    for (int i = m - 1; i >= 0; i--) {
        for (int j = n - 1; j >= 0; j--) {
            dp[i][j] = max(1, min(dp[i + 1][j], dp[i][j + 1]) - dungeon[i][j]);
        }
    }
    return dp[0][0];
}

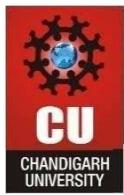

int main() {
    int m, n;
    cout << "Enter dimensions of the dungeon grid (m n): ";
    cin >> m >> n;
```

# DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

```
vector<vector<int>> dungeon(m, vector<int>(n));
cout << "Enter the dungeon grid values: " << endl;
for (int i = 0; i < m; i++) {
    for (int j = 0; j < n; j++) {
        cin >> dungeon[i][j];
    }
}

cout << "Minimum initial health required: " << calculateMinimumHP(dungeon) <<
endl;
return 0;
}
```

The screenshot shows a browser window with three tabs: WhatsApp, ChatGPT, and Online C++ Compiler - Program. The main content is the Programiz Online C++ Compiler. It features a dark-themed interface with a header for 'Premium Coding Courses by Programiz' and a 'Programiz PRO' button. On the left, there's a sidebar with icons for various languages (Python, C, C++, Java, JavaScript, Go, etc.). The central area has a code editor titled 'main.cpp' containing the provided C++ code. To the right is an 'Output' panel showing the terminal session: 'Enter dimensions of the dungeon grid (m n): 1 1', 'Enter the dungeon grid values: 0', 'Minimum initial health required: 1', and '== Code Execution Successful =='. At the bottom, there's a status bar with weather info ('60°F Cloudy'), system icons, and the date/time ('7:54 PM 12/28/2024').

## 9) Sliding Puzzle

```
#include <iostream>
#include <vector>
#include <queue>
#include <unordered_set>
#include <string>
using namespace std;

int slidingPuzzle(vector<vector<int>>& board) {
    string target = "123450";
    string start = "";
    for (auto& row : board)
        for (int cell : row)
            start += to_string(cell);

    vector<vector<int>> dirs = {{1, 3}, {0, 2, 4}, {1, 5}, {0, 4}, {1, 3, 5}, {2, 4}};
    unordered_set<string> visited;
    queue<pair<string, int>> q;
    q.push({start, 0});
    visited.insert(start);

    while (!q.empty()) {
        auto [curr, steps] = q.front();
        q.pop();
        if (curr == target) return steps;

        int zeroPos = curr.find('0');
        for (int dir : dirs[zeroPos]) {
            string next = curr;
            swap(next[zeroPos], next[dir]);
            if (visited.find(next) == visited.end()) {
                visited.insert(next);
                q.push({next, steps + 1});
            }
        }
    }
    return -1; // Impossible to solve
}
```

# DEPARTMENT OF

# COMPUTER SCIENCE & ENGINEERING

```
int main() {
    vector<vector<int>> board(2, vector<int>(3));
    cout << "Enter the 2x3 board configuration row-wise (use 0 for the empty tile):" <<
endl;
    for (int i = 0; i < 2; i++)
        for (int j = 0; j < 3; j++)
            cin >> board[i][j];

    int result = slidingPuzzle(board);
    if (result == -1) {
        cout << "The puzzle is unsolvable." << endl;
    } else {
        cout << "Minimum number of moves to solve the puzzle: " << result << endl;
    }
    return 0;
}
```

The screenshot shows a browser window with three tabs: WhatsApp, ChatGPT, and Online C++ Compiler - Program. The main content is the Programiz C++ Online Compiler interface. The code editor contains the provided C++ code for a sliding puzzle solver. The output panel shows the user input "Enter the 2x3 board configuration row-wise (use 0 for the empty tile):" followed by the board configuration "1 2 3\n4 0 5". The output then displays "Minimum number of moves to solve the puzzle: 1" and "Code Execution Successful". The bottom status bar shows system information like weather (60°F Cloudy), date (12/28/2024), and time (7:57 PM).

```
main.cpp
1 #include <iostream>
2 #include <vector>
3 #include <queue>
4 #include <unordered_set>
5 #include <string>
6 using namespace std;
7
8 int slidingPuzzle(vector<vector<int>>& board) {
9     string target = "123450";
10    string start = "";
11    for (auto& row : board)
12        for (int cell : row)
13            start += to_string(cell);
14
15    vector<vector<int>> dirs = {{1, 3}, {0, 2, 4}, {1, 5}, {0,
16        4}, {1, 3, 5}, {2, 4}};
17    unordered_set<string> visited;
18    queue<pair<string, int>> q;
19    q.push({start, 0});
    visited.insert(start);
```

# **DEPARTMENT OF**

# **COMPUTER SCIENCE & ENGINEERING**

## **10) Super Egg Drop**

```
#include <iostream>
#include <vector>
using namespace std;

int superEggDrop(int k, int n) {
    vector<vector<int>> dp(k + 1, vector<int>(n + 1, 0));
    int moves = 0;

    while (dp[k][moves] < n) {
        moves++;
        for (int i = 1; i <= k; i++) {
            dp[i][moves] = dp[i - 1][moves - 1] + dp[i][moves - 1] + 1;
        }
    }
    return moves;
}

int main() {
    int k, n;
    cout << "Enter the number of eggs: ";
    cin >> k;
    cout << "Enter the number of floors: ";
    cin >> n;

    cout << "Minimum number of moves to find the critical floor: " <<
superEggDrop(k, n) << endl;
    return 0;
}
```

# DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

The screenshot shows a web browser window with three tabs: WhatsApp, ChatGPT, and Online C++ Compiler - Programiz. The main content is the Programiz C++ Online Compiler. The code in the editor is:

```
main.cpp
1 #include <iostream>
2 #include <vector>
3 using namespace std;
4
5 int superEggDrop(int k, int n) {
6     vector<vector<int>> dp(k + 1, vector<int>(n + 1, 0));
7     int moves = 0;
8
9     while (dp[k][moves] < n) {
10         moves++;
11         for (int i = 1; i <= k; i++) {
12             dp[i][moves] = dp[i - 1][moves - 1] + dp[i][moves - 1] + 1;
13         }
14     }
15     return moves;
16 }
17
18 int main() {
19     int k, n;
```

The output window shows:

```
Enter the number of eggs: 1
Enter the number of floors: 2
Minimum number of moves to find the critical floor: 2
==== Code Execution Successful ===
```

At the bottom right, there's a Windows taskbar with icons for search, file explorer, and various apps, along with system status like battery level and time (7:58 PM, 12/28/2024).
